

accessible mutational networks from the double mutant · every position, every residue, strictly uphill, nothing revertable · top row: widest dE double range, bottom row: narrowest

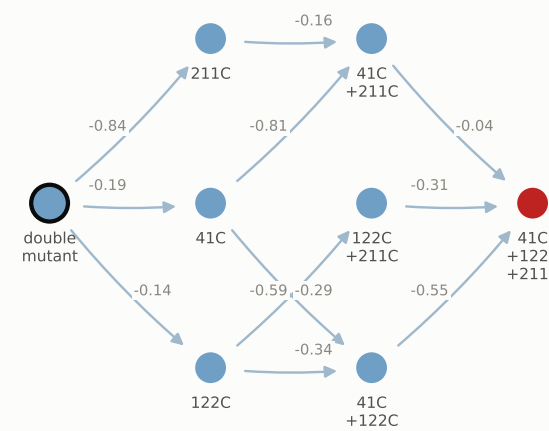

L210W-T215Y
range 19.8 · 8 nodes · 2 dead ends
E(DM) -869.05

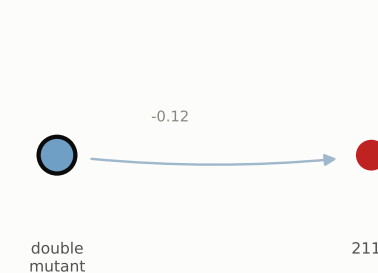

M41L-T215Y
range 17.9 · 2 nodes · 1 dead end
E(DM) -871.26

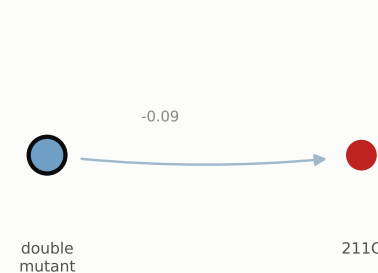

L210W-T215S
range 15.3 · 8 nodes · 1 dead end
E(DM) -867.67

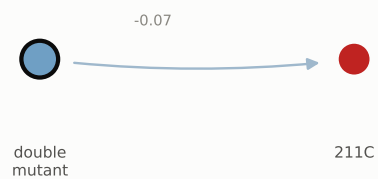

M41L-T215F
range 14.9 · 2 nodes · 1 dead end
E(DM) -869.07

M41L-T215S
range 14.2 · 2 nodes · 1 dead end
E(DM) -869.14

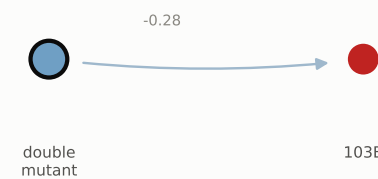

L100I-K103R
range 4.7 · 2 nodes · 1 dead end
E(DM) -866.22

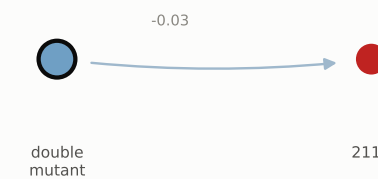

A62V-V75I
range 4.7 · 1 node · 1 dead end
E(DM) -867.74

K101P-D192N
range 4.5 · 2 nodes · 1 dead end
E(DM) -864.06

V75I-F77L
range 4.4 · 2 nodes · 1 dead end
E(DM) -866.11

V75I-I132L
range 4.3 · 1 node · 1 dead end
E(DM) -865.44

● has an improving mutation left ● dead end — none of the 558 moves improves it ● the bare double mutant (root) — one improving, irreversible mutation (label = ΔE)
